De persoonlijke e-mails van de gebruikers, hun sociale media, betalingsverkeer en aankopen zijn met elkaar verbonden door een universeel besturingsprogramma. Het resultaat: iedereen heeft slechts één online identiteit. Een nieuw tijdperk van openheid en gemeenschapszin is aangebroken. Mae laat zich meeslepen door de energie van het bedrijf, de groepsactiviteiten en de feestjes, de oneindige mogelijkheden – zelfs als ze het leven buiten de campus langzaam uit het oog verliest, een ontmoeting met een collega haar in verwarring brengt, en haar bijdrage aan de Cirkel steeds meer openbaar wordt. De Cirkel is een intelligente, scherpe en spannende roman die vragen oproept over ons geheugen, onze geschiedenis, privacy, democratie en de grenzen aan onze kennis van de wereld.

**Transesophageal Echocardiography for Pediatric and Congenital Heart Disease** Pierre C. Wong 2021-07-17 This extensively revised textbook reviews the use of transesophageal echocardiography (TEE) in pediatric and young adult patients with cardiac disease. It reviews how TEE has made a vital contribution to these patients' successful and continually improving clinical outcomes, enabling them to live well into adulthood. The book details the evolving technology and applications of TEE (including three-dimensional TEE), describing how this imaging approach remains at the forefront of clinical practice for pediatric patients and those with congenital heart disease (CHD). Transesophageal Echocardiography for Pediatric and Congenital Heart Disease represents a unique contribution as the only contemporary text to focus exclusively on the clinical application of TEE in children and all patients with CHD. Written by numerous prominent specialists in the field, it presents a comprehensive, modern and integrated review of the subject. Specific chapter topics include the physics and instrumentation of TEE, structural and functional evaluation, and specialized aspects of the examination, with emphasis on the technical considerations pertinent to both pediatric and adult patients with a variety of congenital and acquired cardiovascular pathologies. Consequently, it serves as a comprehensive reference for the TEE evaluation of CHD, utilizing the segmental approach to diagnosis and discussing the TEE evaluation of the many anomalies encompassing the CHD spectrum. In addition, numerous other relevant topics are discussed, including application of TEE for perioperative and interventional settings. The book is richly illustrated, with many chapters supplemented by illustrative case studies and accompanying videos. A specific section with multiple-choice questions and answers is provided at the end of each chapter to reinforce key concepts. This textbook therefore provides an invaluable and indispensable resource for all trainees and practitioners using TEE in the management of CHD and pediatric patients.

A Case Approach to Perioperative Drug-Drug Interactions addresses the complex realm of pharmacokinetic drug interactions in an easy-to-read volume that functions as both a comprehensive clinical reference and a casebook. The book presents a summary of the core concepts of drug interactions; an organized, annotated presentation of the drug interactions most relevant to the perioperative clinician; and approximately 200 case scenarios that highlight specific drug interactions. **Network Nations** Michele Hilmes 2011 In Network Nations, Michele Hilmes reveals and re-conceptualizes the roots of media globalization through a historical look at the productive transnational cultural relationship between British and American broadcasting. Though frequently painted as opposites--the British public service tradition contrasting with the American commercial system--in fact they represent two sides of the same coin. Neither could have developed without the constant presence of the other, in terms not only of industry and policy but of aesthetics, culture, and creativity, despite a long history of oppositional rhetoric. Based on primary research in British and American archives, Network Nations argues for a new transnational approach to media history, looking across the traditional national boundaries within which media is studied to encourage an awareness that media globalization has a long and fruitful history. Placing media history in the framework of theories of nationalism and national identity, Hilmes examines critical episodes of transnational interaction between the US and Britain, from radio's amateurs to the relationship between early network heads; from the development of radio features and drama to television spy shows and miniseries; as each other's largest suppliers of programming and as competitors on the world stage; and as a network of creative, business, and personal relationships that has rarely been examined, but that shapes television around the world. As the global circuits of television grow and as global regions, particularly Europe, attempt to define a common culture, the historical role played by the British/US media dialogue takes on new significance.

**The Pumpkin War** Cathleen Young 2019-05-21 "Cathleen Young's characters will forever have a place in my heart." --Holly Goldberg Sloan, author of *Counting by 7s* Former best friends compete to see who can grow the biggest pumpkin and win the annual giant pumpkin race on the lake. A great pick for fans of *Half a Chance* and *Gertie's Leap to Greatness*. At the end of every summer, Madeline Island hosts its famous pumpkin race. All summer, adults and kids across the island grow giant, thousand-pound pumpkins, then hollow one out and paddle in it across the lake to the cheers of the entire town. Twelve-year-old Billie loves to win; she has a bulletin board overflowing with first-prize ribbons. Her best friend Sam doesn't care much about winning, or at least Billie didn't think so until last summer's race, when his pumpkin crashed into hers as she was about to cross the finish line and he won. This summer, Billie is determined to get revenge by growing the best and biggest pumpkin and beating Sam in the race. It's a tricky science to grow pumpkins, since weather, bugs, and critters can wipe out a crop. Then a surprise visit from a long-lost relative shakes things up, and Billie begins to see her family, and her bond with Sam, in a new way.
