Urban Multilingualism in Europe Giuditta Caliendo 2019-12-02 Today's growing mobility in European urban regions results in a more widespread language diversity, which is increasingly challenging current language policies. Against this background, this volume deals with the interface between language policy, language planning and actual practices. The impact that prevailing language policies have on language practices is observed in a series of urban settings, leading to a reflection on the changes that need to be brought about to promote social inclusion and valorise linguistic diversity in a context of globalisation-affected and migration-related multilingualism. The topics of discussion draw on different theoretical perspectives and span the research fields of linguistics, education, (family) language policy and planning, language acquisition and sociology.

Antisemitism and Anti-Zionism Rusi Jaspal 2016-04-15 Antisemitism and anti-Zionism are complex, delineable, yet inter-related social-psychological phenomena. While antisemitism has been described as an irrational, age-old prejudice, anti-Zionism is often represented as a legitimate response to a 'rogue state'. Drawing upon media and visual sources and rich interview data from Iran, Britain and Israel, *Antisemitism and Anti-Zionism: Representation, Cognition and Everyday Talk* examines the concepts of antisemitism and anti-Zionism, tracing their evolution and inter-relations, and considering the distinct ways in which they are manifested, and responded to, by Muslim and Jewish communities in Iran, Britain and Israel. Providing insights from social psychology, sociology and history, this interdisciplinary analysis sheds light on the pivotal role of the

media, social representations and identity processes in shaping antisemitism and anti-Zionism. As such, this provocative book will be of interest to social scientists working on antisemitism, race and ethnicity, political sociology and political science, media studies and Middle Eastern politics.

Transformative Pedagogical Perspectives on Home Language Use in Classrooms Jules, Janice E. 2020-09-25 Linguists, researchers, and other practitioners in language education acknowledge that the resolution of language problems associated with breaking down language and cultural barriers that hinder the growth of learners' self-identities and national identities is ongoing. In fact, even with decades of research in home language use in the classroom, there are still classrooms worldwide where learners are deprived of the opportunity of building their self-esteem, confidence, and autonomy by communicating with their native language. The global nature of communication requires speakers to use all the languages in their repertoire effectively, thus reinforcing the need to encourage home language use in classrooms. *Transformative Pedagogical Perspectives on Home Language Use in Classrooms* is a cutting-edge research publication on the effective use of home language in the classroom that emphasizes the significance of this activity to the success of the overall language development of the learner. Particular attention is given to transformative pedagogy and the provision of valuable insights into how the teacher can guide and assist learners in the development of critical thinking skills. In addition, the book provides content that enables practitioners in language education and parents to explore their roles in assisting children in breaking down the language and cultural barriers that hinder the growth of their self-identity and national identity. Highlighting topics such as engineering education, cultural responsiveness, and transformative pedagogy, this book is essential for linguists, academicians, education professionals, curriculum designers, policymakers, administrators, instructional designers, researchers, and students.

Co-Enrollment in Deaf Education Marc Marschark 2019-03-01 Co-enrollment programming in deaf education refers to classrooms in which a critical mass of deaf and hard-of-hearing (DHH) students is included in a classroom containing mainly hearing students and which is taught by both a mainstream teacher and a teacher of the deaf. It thus offers full access to both DHH and hearing students in the classroom through "co-teaching" and avoids academic segregation of DHH students, as well as their integration into classes with hearing students without appropriate support services or modification of instructional methods and materials. Co-enrollment thus seeks to give DHH learners the best of both (mainstream and separate) educational worlds. Described as a "bright light on the educational horizon," co-enrollment programming provides unique educational opportunities and educational access for DHH learners comparable to that of their hearing peers. Co-enrollment programming shows great promise. However, research concerning co-enrollment programming for DHH learners is still in its infancy. This volume sheds light on this potentially groundbreaking method of education, providing descriptions of 14 co-enrollment programs from around the world, explaining their origins, functioning, and available outcomes. Set in the larger context of what we know and what we don't know about educating DHH learners, the volume offers readers a vision of a brighter future in deaf education for DHH children, their parents, and their communities.

Family Language Policy in the Polish Diaspora Piotr Romanowski 2021-04-06 This book explores language practices, beliefs and management across a group of Polish immigrant families in Australia, drawing on these case studies as a lens through which to unpack dynamics of Family Language Policy (FLP) and their implications for future research on FLP. The volume begins by outlining the historical context of Polish immigration in Australia, charting two key waves of Polish migration in the 20th century and the subsequent unfolding of issues around language and culture maintenance in these families. This discussion paves the way for exploring key themes of language socialization, language ideologies and heritage language maintenance and the affordances of FLP research in elucidating these dynamics at work in the lived experiences of a group of Polish immigrant families in Melbourne. The book highlights the importance of a triangulated approach, integrating qualitative and quantitative methods, in offering nuanced insights into parental approaches and children's experiences of a bilingual upbringing and the wider impact of FLP on transnational families. Opening up avenues for future research on Family Language Policy and a better understanding of the language practices of specific communities in a globalised world, this book will be of interest to scholars in

multilingualism, sociolinguistics and applied linguistics.

The Working Class Ian Gilbert 2018-03-27 In *The Working Class: Poverty, education and alternative voices*, Ian Gilbert unites educators from across the UK and further afield to call on all those working in schools to adopt a more enlightened and empathetic approach to supporting children in challenging circumstances. One of the most intractable problems in modern education is how to close the widening gap in attainment between the haves and the have-nots. Unfortunately, successive governments both in the UK and abroad have gone about solving it the wrong way. Independent Thinking founder Ian Gilbert's increasing frustration with educational policies that favour 'no excuses' and 'compliance', and that ignore the broader issues of poverty and inequality, is shared by many others across the sphere of education - and this widespread disaffection has led to the assembly of a diverse cast of teachers, school leaders, academics and poets who unite in this book to challenge the status quo. Their thought-provoking commentary, ideas and impassioned anecdotal insights are presented in the form of essays, think pieces and poems that draw together a wealth of research on the issue and probe and discredit the current view on what is best for children from poorer socio-economic backgrounds. Exploring themes such as inclusion, aspiration, pedagogy and opportunity, the contributions collectively lift the veil of feigned 'equality of opportunity for all' to reveal the bigger picture of poverty and to articulate the hidden truth that there is always another way. This book is not about giving you all the answers, however. The contributors are not telling teachers or schools leaders how to run their schools, their classroom or their relationships - the field is too massive, too complex, too open to debate and to discussion to propose 'off-the-shelf' solutions. Furthermore, the research referred to in this book is not presented in order to tell educators what to think, but rather to inform their own thinking and to challenge some of the dominant narratives about educating the 'feckless poor'. This book is about helping educators to ask the right questions, and its starting question is quite simple: how can we approach the education of young people from disadvantaged backgrounds in a way that actually makes a difference for all concerned? Written for policy makers and activists as well as school leaders and educators, *The Working Class* is both a timely survey of the impact of current policies and an invaluable source of practical advice on what can be done to better support disadvantaged children in the school system. Edited by Ian Gilbert with contributions from Nina Jackson, Tim Taylor, Dr Steven Watson, Rhythmical Mike, Dr Ceri Brown, Dr Brian Male, Julia Hancock, Paul Dix, Chris Kilkenny, Daryn Egan-Simon, Paul Bateson,

Australian Aboriginal English Ian G. Malcolm 2018-05-22 The dialect of English which has developed in Indigenous speech communities in Australia, while showing some regional and social variation, has features at all levels of linguistic description, which are distinct from those found in Australian English and also is associated with distinctive patterns of conceptualization and speech use. This volume provides, for the first time, a comprehensive description of the dialect with attention to its regional and social variation, the circumstances of its development, its relationships to other varieties and its foundations in the history, conceptual predispositions and speech use conventions of its speakers. Much recent research on the dialect has been motivated by concern for the implications of its use in educational and legal contexts. The volume includes a review of such research and its implications as well as an annotated bibliography of significant contributions to study of the dialect and a number of sample texts. While Aboriginal English has been the subject of investigation in diverse places for some 60 years there has hitherto been no authoritative text which brings together the findings of this research and its implications. This volume should be of interest to scholars of English dialects as well as to persons interested in deepening their understanding of Indigenous Australian people and ways of providing more adequately for their needs in a society where there is a disconnect between their own dialect and that which prevails generally in the society of which they are a part.

Enlightenment Travel and British Identities Mary-Ann Constantine 2017-04-15 'Weaving together science, history, antiquarianism and art, this stimulating collection of essays amply demonstrates Thomas Pennant's centrality to a broad range of British Enlightenment debates and discourses, especially those relating to Britain's so-called "Celtic Fringe". At the same time, it underscores the epistemological importance of travel and travel writing in the late eighteenth century.' —Carl Thompson, Senior Lecturer in English, St Mary's University, UK

Courtyard Housing for Health and Happiness Donia Zhang 2016-03-09 Health and happiness are fundamental to human quality of life. The United Nations World Happiness Report 2012 reflects a new worldwide call for governments to include happiness as a criterion to their policies. The Healthy Cities or Happy Cities movement has been endorsed by the WHO since 1986, and a Healthy House or Happy Home is a critical constituent of a healthy city or a happy city. Nevertheless, the concept has not been fully explored. Existing literature on the healthy house has often focused on the technical, economic, environmental, or biochemical aspects, while current scholarship on the happy home commonly centers on interior decoration. Few studies have addressed the importance of social and cultural factors that affect the health and happiness of the occupants. Identifying four key themes in Chinese philosophy to promote health and happiness at home, this book links architecture with Chinese philosophy, social sciences, and the humanities, and in doing so, argues that Architectural Multiculturalism is a vital ideology to guide housing design in North America. Using both qualitative and quantitative evidence gathered from ethnic Chinese and non-Chinese living in the USA and Canada, the study proposes that the Courtyard is a central component to promote social and cultural health and happiness of residents. It further details courtyard garden house design strategies that combine a sense of privacy with a feeling of community as represented in courtyard housing. The schemes may have universal implications.

English Learners in STEM Subjects National Academies of Sciences, Engineering, and Medicine 2019-01-28 The imperative that all students, including English learners (ELs), achieve high academic standards and have opportunities to participate in science, technology, engineering, and mathematics (STEM) learning has become even more urgent and complex given shifts in science and mathematics standards. As a group, these students are underrepresented in STEM fields in college and in the workforce at a time when the demand for workers and professionals in STEM fields is unmet and increasing. However, English learners bring a wealth of resources to STEM learning, including knowledge and interest in STEM-related content that is born out of their experiences in their homes and communities, home languages, variation in discourse practices, and, in some cases, experiences with schooling in other countries. *English Learners in STEM Subjects: Transforming Classrooms, Schools, and Lives* examines the research on ELs' learning, teaching, and assessment in STEM subjects and provides guidance on how to improve learning outcomes in STEM for these students. This report considers the complex social and academic use of language delineated in the new mathematics and science standards, the diversity of the population of ELs, and the integration of English as a second language instruction with core instructional programs in STEM.

Pronunciation and Phonetics Adam Brown 2014-03-26 This engaging, succinct text is an introduction to both phonetics and phonology as applied to the teaching of pronunciation to English language learners. Section 1 selectively covers the main areas of phonetics and phonology, without going into any area in more depth than the average English language teacher requires or that the average English language teacher trainee can handle. Section 2 focuses on practical issues related to learners and how they learn languages, and what represents good practice in terms of classroom activities for pronunciation—including aspects such as targets, motivation and priorities. The chapters end with activities to help the reader understand concepts. Section 3 provides innovative sample activities which put into practice the theoretical points

covered in the first two sections, answers to the various exercises, recommended further reading (both print and non-print), a glossary of technical phonetic terms, and a bibliography of works on pronunciation teaching. The text is accompanied by a Companion Website with audio recordings of model pronunciations and audio material relating to the activities.

Languages other than English in Australian Higher Education

Jennifer Joan Baldwin 2019-01-29 This book researches the study of languages other than English, and their place in the Australian tertiary sector. Languages are discussed in the context of the histories of Australian universities, and the series of reports and surveys about languages across the second half of the twentieth century. It demonstrates how changes in the ethnic mix of society are reflected in language offerings, and how policies on languages have changed as a result of societal influences. Also discussed is the extent to which influencing factors changed over time depending on social, cultural, political and economic contexts, and the extent to which governments prioritised the promotion and funding of languages because of their perceived contribution to the national interest. The book will give readers an understanding as to whether languages have mattered to Australia in a national and international sense and how Australia's attention to languages has been reflected in its identity and its sense of place in the world.

The Globalization of Internationalization Hans de Wit 2017-01-20 The Globalization of Internationalization is a timely text which gives voice to emerging perspectives as an increasing range of countries engage in the process of internationalization. The pressure to internationalize cannot be ignored by institutions anywhere in today's world, yet the dominant paradigms in the conception of internationalization traditionally come from the English-speaking world and Western Europe. This book sets out to offer alternative viewpoints. Different dimensions and interpretations of internationalization in countries and regions whose perspectives have received little attention to date provide food for thought, and help to broaden understanding of its application in alternative contexts. Combining diverse perspectives from around the world, this new volume in the Internationalization in Higher Education series seeks answers to key questions such as: What are the main characteristics of internationalization viewed from different cultural and regional backgrounds and how do they differ from traditional models such as in Western Europe, North America and Australasia? What issues in different global contexts have an impact on internationalization processes? What are the key challenges and obstacles encountered in developing innovative and non-traditional models of internationalization? With contributions from world-renowned international authors, and perspectives from countries and contexts seen only rarely in the literature, *The Globalization of Internationalization* offers distinctive overviews and insights while exploring a range of thematic and regional issues arising from these considerations. This will be essential reading both as an academic resource and a practical manual for university leaders, academics, higher education policy advisers and non-governmental organizations which fund higher education.

Promoting the Educational Success of Children and Youth

Learning English National Academies of Sciences, Engineering, and Medicine 2017-08-25 Educating dual language learners (DLLs) and English learners (ELs) effectively is a national challenge with consequences both for individuals and for American society. Despite their linguistic, cognitive, and social potential, many ELs "who account for more than 9 percent of enrollment in grades K-12 in U.S. schools" are struggling to meet the requirements for academic success, and their prospects for success in postsecondary education and in the workforce are jeopardized as a result. *Promoting the Educational Success of Children and Youth Learning English: Promising Futures* examines how evidence based on research relevant to the development of DLLs/ELs from birth to age 21 can inform education and health policies and related practices that can result in better educational outcomes. This report makes recommendations for policy, practice, and research and data collection focused on addressing the challenges in caring for and educating DLLs/ELs from birth to grade 12.

Spinglish Henry Beard 2015-06-02 Spinglish—the devious dialect of English used by professional spin doctors—is all around us. And the fact is, until you've mastered it, politicians and corporations (not to mention your colleagues and friends) will continue putting things over on you, and generally getting the better of you, every minute of every day—without your even knowing it. However, once you perfect the art of terminological inexactitude, you'll be the one manipulating and one-upping everyone else! And here's the beauty part: Henry Beard and Christopher Cerf, authors of the New York Times semi-bestseller *The Official Politically Correct Dictionary and Handbook*, have compiled this handy yet astonishingly comprehensive lexicon and translation guide—a fictionary, if you will—to help you do just that. If you want to succeed in business (or politics, sports, the arts, or life in general) without really lying, this is the book for you! (Your results may vary.) Spinglish includes these nifty bits of spurious verbiage and over a thousand more: aesthetic procedure - face-lift dairy nutrients - cow manure enhanced interrogation techniques - torture "For your convenience." - "For our convenience." hands-on mentoring - sexual relations with a junior employee incomplete success - failure rightsizing - firing people zero-tasking - doing nothing With each and every entry sourced from some of the greatest real-life language benders in the world today, you're virtually guaranteed to have the perfectly chosen tried-and-untrue term right at the tip of your forked tongue. Wish you could nimbly sidestep a question without batting an eye? Not sure how to apologize while also . . . not apologizing? Spinglish has you covered. Simply consult this convenient, shoot-from-the-lip glossary, and before you know it, you'll be telling it like it isn't, it wasn't, and it couldn't ever have been.
