Welkom in het Novaceen James Lovelock 2020-02-13 James Lovelock komt in Novaceen met een nieuwe theorie over de toekomst van het leven op aarde.

Lovelock, de schepper van de Gaia-hypothese, auteur van de wereldwijde bestseller Gaia, en de grootste denker over milieu van onze tijd, betoogt dat het Antropoceen - het tijdperk waarin de mens met technologie over de wereld begon te heersen - na 300 jaar ten einde is. Een nieuw tijdperk is al begonnen.

Welkom in het Novaceen. Kunstmatige intelligentie zal nieuwe levensvormen creëren. Ze zullen 10 000 keer sneller denken dan wij en ze zullen ons beschouwen zoals wij planten beschouwen: als hopeloos traag werkende en denkende mechanismen. Maar dat betekent niet dat de mens een gewelddadig einde tegemoet gaat. Deze hyperintelligente wezens zullen net zo afhankelijk zijn van de gezondheid van de planeet als wij. Op honderdjarige leeftijd heeft James Lovelock het belangrijkste en meest fascinerende werk van zijn leven geschreven.

The exposition is illustrated with more than 40 tables and more than 30 figures. The book has several innovative features: a) methodical recommendations to students, b) Monte Carlo simulations in Excel, c) the Markovitz portfolio theory, d) a separate chapter on links to Econometrics, and e) usage of statistical functions in Excel and Mathematica instead of statistical tables.
