Proteins are both biological entities and physicochemical compounds, and they will be examined in both contexts in this volume. The chemical and physical properties of proteins will be viewed from the perspective of chemists despite the fact that their use in the food supply emphasizes their biological nature. Key topics discussed include proteins as essential to life; amino acids; protein classification; selected proteins of the most important food systems; and protein structure. The book also includes chapters on protein measurement; protein purification; and spectral techniques for the study of proteins. The book requires readers to have the equivalent of the Institute of Food Technologists requirements for

undergraduate food science majors. It also assumes a knowledge of math through calculus. While primarily intended for senior and first-year graduate food science students, the text may also be useful to researchers in allied fields.

### **Handboek gynaecardiologie**

A.H.E.M. Maas 2015-01-13 Veel fysiologische en pathologische functies in het lichaam worden beïnvloed door biologische verschillen tussen de beide seksen. Mannen en vrouwen verschillen in patronen van klachten, ziekte, metabolisme en reageren vaak verschillend op behandelingen. Met name binnen de cardiologie zijn er veel genderverschillen. Kennis hiervan is van belang voor een goede patiëntenzorg.

Cardiovasculaire ziekten (CVZ)

zijn niet alleen in Nederland, maar ook wereldwijd de belangrijkste doodsoorzaak bij vrouwen. Dit wordt in de praktijk nog vaak onderschat. Vrouwen uiten hun klachten anders dan mannen en de aanvullende diagnostiek heeft meer valkuilen. De obstetrische voorgeschiedenis kan al op jonge leeftijd wijzen op een verhoogd risico voor CVZ. De menopauze is een keerpunt in een vrouwenleven en een belangrijke levensfase voor het nemen van adequate preventieve maatregelen voor een gezonde oude dag. De afgelopen twee decennia is de internationale belangstelling voor genderspecifieke zorg en onderzoek binnen de cardiologie sterk toegenomen en er is veel voortschrijdend inzicht op dit terrein. Handboek gynaecardiologie biedt de meest recente kennis over vrouwspecifieke aspecten van de cardiologische zorg die relevant is voor zowel de eerste als de tweede lijn.

Angels, Let's Talk Orlando Constantine 2007-10-01 The anointing received is the deciding factor of the truth on this subject, which is unparalleled in content as being current, biblical and to the point. Why are you angels here, where are you coming from and do you give a ?damn? where you are going!? This book intend to bring a resolution to these questions and if eternal damnation is obvious, redemption is also plausible; as one extremity has a equal opposite, except in the case of God. "Come now, and let us reason together, saith the LORD: though your sins be as scarlet, they shall be as white as snow; though they be red like crimson, they shall be as wool" (Isaiah 1:18).

Aylward 2003 This publication considers environmental, social and economic issues concerning the development of nature tourism. Using KwaZulu-Natal in South Africa as a case study, it highlights the benefits and trade-offs in promoting and managing sustainable nature tourism development, and examines how to promote the objectives of economic growth, poverty reduction and conservation. Three key issues are explored: the need to move beyond development of a wildlife industry to the creation of a true nature tourism economy that supports biodiversity; the role of the private sector in achieving equitable development and job creation while generating conservation finance; and alternative pricing and other

market mechanisms to encourage the growth and economic viability of nature tourism.
